

CALIBRATION AND TESTING

We have six test rigs and offer world class aftersales, care and calibration. Straightpoint endeavour to calibrate, certify and despatch equipment to any location, worldwide, within two working days of receipt.
For express calibration services, please contact our service department.

All rigs are UKAS traceable and are detailed below:

- 1) 250kg dead weight rig
- 2) 5t hydraulic tensile rig
- 3) 5t hydraulic compressive rig
- 4) 20t hydraulic compressive rig
- 5) 30t hydraulic tensile rig
- 6) 350t hydraulic universal test machine

In addition, we have a range of certified dead weights and loadcells for testing.

| Recalibration Range | 0-5,000kg | 5,001 - 12,000kg | 12,001 - 30,000kg | 30,001 - 50,000kg | 50,001 - 100,000kg | 100,001 - 250,000kg | 250,001 - 350,000kg |
|---------------------|-----------|------------------|-------------------|-------------------|--------------------|---------------------|---------------------|
|---------------------|-----------|------------------|-------------------|-------------------|--------------------|---------------------|---------------------|

Please note: Return carriage at cost is added to these service costs.

We can also proof test units at the time of calibration to twice SWL.

| Proof Test Range | 0-5,000kg | 5,001 - 12,000kg | 12,001 - 30,000kg | 30,001 - 50,000kg | 50,001 - 250,000kg |
|------------------|-----------|------------------|-------------------|-------------------|--------------------|
|------------------|-----------|------------------|-------------------|-------------------|--------------------|

Straightpoint also calibrate and certify most other manufacturers' products, please contact our service department for more information.

Please send loadcells for calibration to:
